DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 recites the limitation "adapted to receive <u>said frame</u>" in line 8. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8,11-21, 28-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Williams et al. (USPN 4,817,800).

Williams discloses a fluid injection system cassette that comprises a cassette containing a group of sealed cells for delivering doses of fluid to be injected into a sterilizing chamber. The Examiner interprets the sealed cells to be the card for retaining the biological sample having an upper face and a lower face. The sealed cells are held in a platform that has an upper surface, lower surface and a recess through the upper and lower surfaces (figure 2-4). The sealed cells can be accessed in an upper surface 46 or lower surface 50 or 52 as seen in figure 2 and 3. This cassette as seen in

Application/Control Number: 10/648,088

Art Unit: 1743

figure 1 is adapted to be placed into a fluid injection system as seen in figure 1. This would be the container including a compartment to receive the cassette as in the instant application. The cassette is received by the compartment via platen 72 which is deployed into a receiving position by spring 74 (col. 6, lines 31-37). Regarding claim 3, when the platen receives the cassette the platen is moved from a receiving location (deployed) to a working location which is secured in the container (col. 6, lines 31-37). Regarding claim 5, the Examiner maintains that when the cassette is in the fluid transfer container, the cassette is sealed and the springs prevent the cassette from being manually operable after the platen 72 is in a working position (liquid transfer). Regarding claim 6 and 7, a bar code is on the cassette to identify the dates and the cassette when which the cells were packed with fluid (col. 5, line- col. 6, line 2). The bar code is visible when the cassette is placed in the container for transferring liquid because the container is made out of plastic. Regarding claim 8, the cassette is fully removable from the container as seen in figure 1.

Allowable Subject Matter

Claims 9-10 and 21-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Samuel P. Siefke whose telephone number is 571-272-1262. The examiner can normally be reached on M-F 7:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill A. Warden can be reached on 571-272-1700. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
